- Taking Customer orders.
- Serving Customers their meals.

Retail Operations Assistant

Quiz Clothing

September 2016 – March 2017 Glasgow

- Updating the Company Intranet.
- Completing the Daily Sales Report.

PROJECTS

Honors Project

Glasgow Caledonian University Dissertation Project

1 Year

This was the project I developed for my honours year at university. The project task was to develop an AI that can play the game solitaire. It was developed in python using pytorch and openAI and involved creating a custom environment in order for the game to run and for the AI to know what files it needed to use in order for everything to work properly.

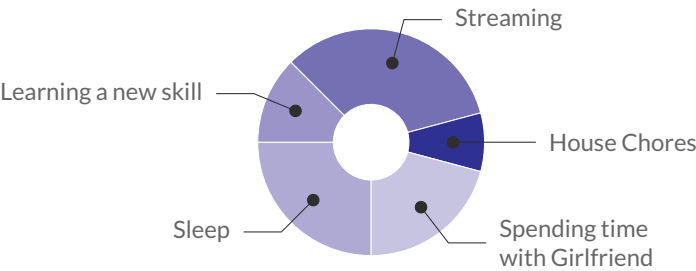

TMPST

Glasgow Caledonian University Coursework

12 Weeks

This project was a coursework for university. The website is an API data reader in which the user can look at the weather for a city, look at the population for a country, look at the mortality rate for a country, check earthquake data for a selected period and how strong the earthquakes were, check the air pollution for a country and check what the most popular news stories were for the day in a country.

A DAY OF MY LIFE

MOST PROUD OF

Overhauled Sales Report

I redesigned the way the sales report was done in Quiz Clothing. I made it fully automated to the point where all that had to be done was export the numbers and send them off to the correct people.

STRENGTHS

- Hard-working
- Eye for detail
- Motivator & Leader
- Problem solver
- Team-working

- C++
- Sql Databases
- C Sharp
- Python
- Java
- Swift
- AngularJS
- React
- Django
- .Net
- Bash scripting
- MVC5
- android studio

LANGUAGES

English ●●●●●

EDUCATION

B.Sc(Hons) Computing

Glasgow Caledonian University

Sept 2018 – June 2020

Project Title: Can a Neural network play solitaire. Grade: 2:1

HND Computing: Software Development

City of Glasgow College

Sept 2017 – June 2018

Grade: B

INTERESTS

- Ai Development
- Tae Kwon do
- Machine Learning
- Playing Dungeons and Dragons
- Playing Magic the gathering
- Playing World of warcraft
- Creating Youtube Videos
- Live Streaming to Twitch
